RICHARD RUDENKO

FULLSTACK DEVELOPER

PROFESSIONAL SUMMARY

PHP Symfony Developer with expertise in **MySQL, Git, Webpack, REST API**, and **Docker**, specializing in building scalable backend systems and high-performance web applications. **Skilled in leveraging Symfony** for efficient architectures and seamless integration of React to enhance user interfaces.

Continuously learning and adopting cutting-edge technologies to optimize business processes and improve user experiences.

EMPLOYMENT HISTORY

FULL-STACK DEVELOPER *Cumas365*

Dec 2023 - Present
Munich, Germany

- Developed websites using **Symfony** and integrated it with **React** to enhance performance and optimize speed.
- Utilized modern technologies such as **Docker, Composer, Doctrine, MySQL, TypeScript**, and **SCSS** for project development and management.
- Designed solutions to streamline and improve business processes for companies by developing websites that automate and optimize internal workflows.

FREELANCE DEVELOPER

Oct 2023 - Present

- Independently developed websites for various companies using **Symfony and React**, delivering robust and **dynamic web applications**.
- Worked collaboratively with teams to address complex challenges and improve existing projects, ensuring high performance and maintainability.
- Integrated React into existing Symfony** applications to enhance user interfaces and extend functionality.
- Developed projects using **Vue.js**, efficiently handling backend requests and API integrations.
